Delhi - 110091

SOFT SKILLS

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Problem Solving

TECH SKILLS

- Cloud Security
- SQL, MySQL
- Linux
- MERN Stack
- Forensic Analysis
- Vulnerability Scanning
- Cybersecurity Fundamentals
- Zero Trust Architecture
- Network Security
- Identity and Access Management (IAM)
- Git & GitHub
- Jenkins (CI/CD)
- Python

LANGUAGES

- English (Fluent)
- Hindi (Fluent)

PROFILE

I'm a Pre - Final Year Cybersecurity undergraduate with knowledge on Network Security, OWASP, Cyber Forensics, Azure Cloud Security complemented by hands-on experience in SIEM Tools and Frontend Development using React and Vite. I aim to build a career in SOC Operations, Threat Detection and Incident Response. Currently preparing for CompTIA Security+ Certification and seeking a 1-year Cybersecurity or SOC Internship.

EDUCATION

- NIIT University, Neemrana, Rajasthan** 2023 - Present
Bachelor of Technology - BTech in Cyber Security
- Somerville School, Vasundhara Enclave** 2009 - 2023
High School

SELF DRIVEN PROJECTS

LINUX LOG ANALYSIS AND BRUTE FORCE ATTACK DETECTION

- Simulated a brute force attack by performing multiple failed SSH login attempts on a Kali Linux VM.
- Detected failed authentication attempts using "journalctl" command.
- Analyzed login patterns using Linux Command-line tools.
- Documented findings and created a structured incident analysis report.

SPLUNK LOG ANALYSIS & SECURITY MONITORING

- Built a SIEM dashboard using Splunk to analyze Windows Event Logs
- Created SPL queries to detect failed logins and suspicious activity
- Identified brute-force attack patterns from login behavior
- Monitored privileged account activity and unusual access
- Designed dashboards to visualize security trends

SIEM-BASED SOC LAB USING WAZUH

- Built a SIEM-based SOC lab using Wazuh with multi-VM setup
- Generated and analyzed security logs
- Simulated brute-force attacks and detected login failures
- Performed privilege escalation testing and analyzed alerts
- Monitored real-time log ingestion and correlation
- Identified attack patterns through analysis

ACADEMIC PROJECTS

ZERO TRUST ARCHITECTURE WITH HYBRID CLOUD (ONGOING PROJECT)

- Developing a framework based on Zero Trust principles for a hybrid cloud environment.
- Implemented RBAC to allow permissions based on user roles.
- Integrates authentication and authorization to prevent unauthorized access

FORENSIC-AI: AN INTELLIGENT DEEPFAKE VIDEO DETECTION FOR DIGITAL EVIDENCES (ONGOING PROJECT)

- Evaluating cross dataset generalization to test model performance on unseen datasets.
- Building a Deep Learning Model based on Vision Transformer (ViT) to detect deepfake videos
- Aiming to improve digital forensic authentication of video evidence

CAREER COUNSELING MANAGEMENT SYSTEM

- Developed a database management system to provide career guidance.
- Implements data storage, retrieval, and management using database technologies.

EXPLORING THE MAZE: A COMPARATIVE STUDY OF PATH FINDING ALGORITHMS FOR PAC-MAN GAME

- Conducted a comparative analysis of search algorithms using path findings.
- Implemented DFS, BFS, UCS and A* algorithms in PAC-MAN game.
- Evaluated algorithm-based performance across different maze sizes and complexities.

QUANTUM ANALYSIS OF AES USING SHANNON'S THEORY

- Performed a cryptographic research analysis of AES encryption variants (AES-128, AES-192, AES-256)
- Evaluated security using Shannon's Information Theory concepts such as entropy and redundancy.

ATDAM: ADAPTIVE THREAT DETECTION AND AUTOMATED MITIGATION FRAMEWORK (RESEARCH STUDY)

- Researched on cybersecurity framework for adaptive threat detection and automated mitigation.
- Combines signature-based and anomaly-based techniques.
- Designed to identify threats faster and reduce attacker dwell time.

CERTIFICATIONS

■ CYBERSECURITY ANALYST JOB SIMULATION – TATA CONSULTANCY SERVICES (FORAGE)

- Worked on IAM fundamentals and strategy assessment.
- Explored IAM integration and security solution implementation.

■ CYBERSECURITY JOB SIMULATION – MASTERCARD (FORAGE)

- Completed simulation as a part of Mastercard's Security Awareness Team
- Identified and analysed phishing threats.

■ INTRODUCTION TO CYBERSECURITY – IBM SKILLSBUILD

- Learned core cybersecurity concepts, common threats and defensive practices.

■ TRYHACKME SOC SIMULATION

- Completed SOC simulation involving real-world alert triage and investigation
- Analyzed security alerts and identified true vs false positives
- Worked with SIEM tools to investigate logs and suspicious activity
- Documented findings through structured case reports

■ ENDPOINT SECURITY - CISCO NETWORKING ACADEMY

- Learned endpoint protection and security fundamentals
- Covered malware, attacks, and system protection techniques

ROLES AND RESPONSIBILITIES

■ President, Agraga - The Management Society of NIIT University

■ Social Media Head - Her Campus at NU

■ Member, Student Affairs Committee (SAC) – Event Coordination, Student Welfare
